Choose from two agriculture-based programs. Integrated Agriculture and Food Systems prepares students to develop and manage their own farm business or have careers in agricultural and horticultural science, sales or production. A transfer degree in Agriculture prepares students to transfer to Montana State University.
Integrated Agriculture and Food Systems

Two-year Associate of Applied Science degree

Learn the fundamentals of crop, soil and livestock management and the business skills necessary to operate a farm enterprise. The program focuses on the integration of crop and livestock production principles to create sustainable farming and food systems.

Through laboratory courses, field trips and internships on the FVCC campus farm and in the community, the Integrated Agriculture and Food Systems program provides students with a hands-on, multidisciplinary experience in agriculture and food systems.

Agriculture Transfer

Associate of Science (AS) transfer degree

Take a range of freshman and sophomore-level classes to prepare to transfer to one of three Bachelor of Science programs offered within the College of Agriculture at Montana State University – Bozeman.

Transfer Bachelor of Science concentration areas include:
• Agricultural Business
• Sustainable Food and Bioenergy Systems
• Plant Science
